Lingopass

OVERVIEW

At Lingopass, we believe the best teaching approach is one that adapts to your needs and learning preferences. That's why we offer a **complete, flexible** program that combines self-study with interactive live classes.

In courses from beginner to advanced (A1 to C2), you'll find: **12 self-study units** and **4 assessment stages**. In the A0 course, 7 self-study units and 3 assessment stages.

You also get unlimited access to different live class formats to practice what you've learned and reach fluency!

Goal-Based Schedule

HOW TO ORGANIZE YOUR STUDIES

To reach your goal of completing a level in 6 months while taking live classes.

Tips for Reaching Fluency

ASSESSMENT

Throughout the course, set aside time for your **assessments**. It's important to **review** what you've studied before: you can use the workbooks and the exercises in the path. If your first score isn't high enough, check the feedback from your first attempt before trying again.

PREPARATION

Live classes come with exclusive downloadable materials. Use them to prepare beforehand and review the content afterward.

IMMERSION

In your free time, listen to music and podcasts, watch shows and movies, and read books in the language you're studying. Exposure to the language in different ways builds your knowledge and helps you go further!

Q&A SESSIONS

We offer live sessions to answer your questions. Just check the available times on the calendar, based on each session's name:

- Questions directly with a tutor: **EN | Q&A Session** or **ES | Resolución de Dudas** or **FR | Foire aux questions**

Contacts

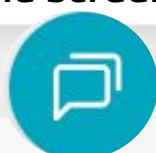

If you **have questions** about how the learning paths work or need help checking your goals, our team is here to help. Here's what we cover:

Common topics

- Explain the platform's features and tools;
- Suggest a study schedule based on your goal;
- Share details about your program (included courses, access period, extensions, etc.);
- Suggest possible solutions if something is keeping you from studying;
- Collect your feedback and suggestions for improving the platform.
